## This industry takes some beating

Quite simply, the Vehicle Repair industry is what drives Britain! From Minis to Porsches, motorbikes to camper vans, we repair accident damage to get drivers back on the road with the minimum of disruption.

This is a high-volume industry, with some big repairers processing over 100 cars every week. Join us and you could work on prestige brands like Tesla - or repair cars for customers of big insurers like LV=.

## What to expect at the event

As well as practical demonstrations from product manufacturers and suppliers, you can try out industry skills like how to use a spray gun. You will also be able to see how other people work in the management and commercial aspects of the business.

Business owners and recruiters will be on hand to talk you through the next steps should you feel a Vehicle Repair Apprenticeship is right for you.
